PROMISE ME  
by  
Carson Morton

Standing here together on our wedding day  
Making one heart out of two  
Even after all the sacred vows we made  
There is one more thing I have to ask of you

Promise me  
You will always be my friend  
At my side through thick and thin  
Till we reach our journey's end, promise me

Promise me  
You will be there when I need  
Someone who believes in me  
Someone who can help me be  
All I can be, promise me

Promise me  
You will be there when I need  
Someone who believes in me  
Someone who can help me be  
All I can be, promise me

Standing here in something borrowed something blue  
A diamond ring, a band of gold  
But the only gifts I really want from you  
Are the promises that can't be bought or sold

Promise me  
That when we're alone at night  
We can turn down all the lights  
And share what's on our minds, promise me

Promise me  
That when we are far apart  
You will keep me in your heart  
Till I come back to your arms  
Safe from harm, promise me (instrumental)

Promise me  
You will always be my friend  
At my side through thick and thin  
Till we reach our journey's end, promise me

Promise me  
You will be forever mine  
Till the stars slip from the sky  
And we'll be for all our lives      Man and wife, promise me
